Citesal | industry

We apply to the industry our
expertise and knowledge
about aluminium extrusion.

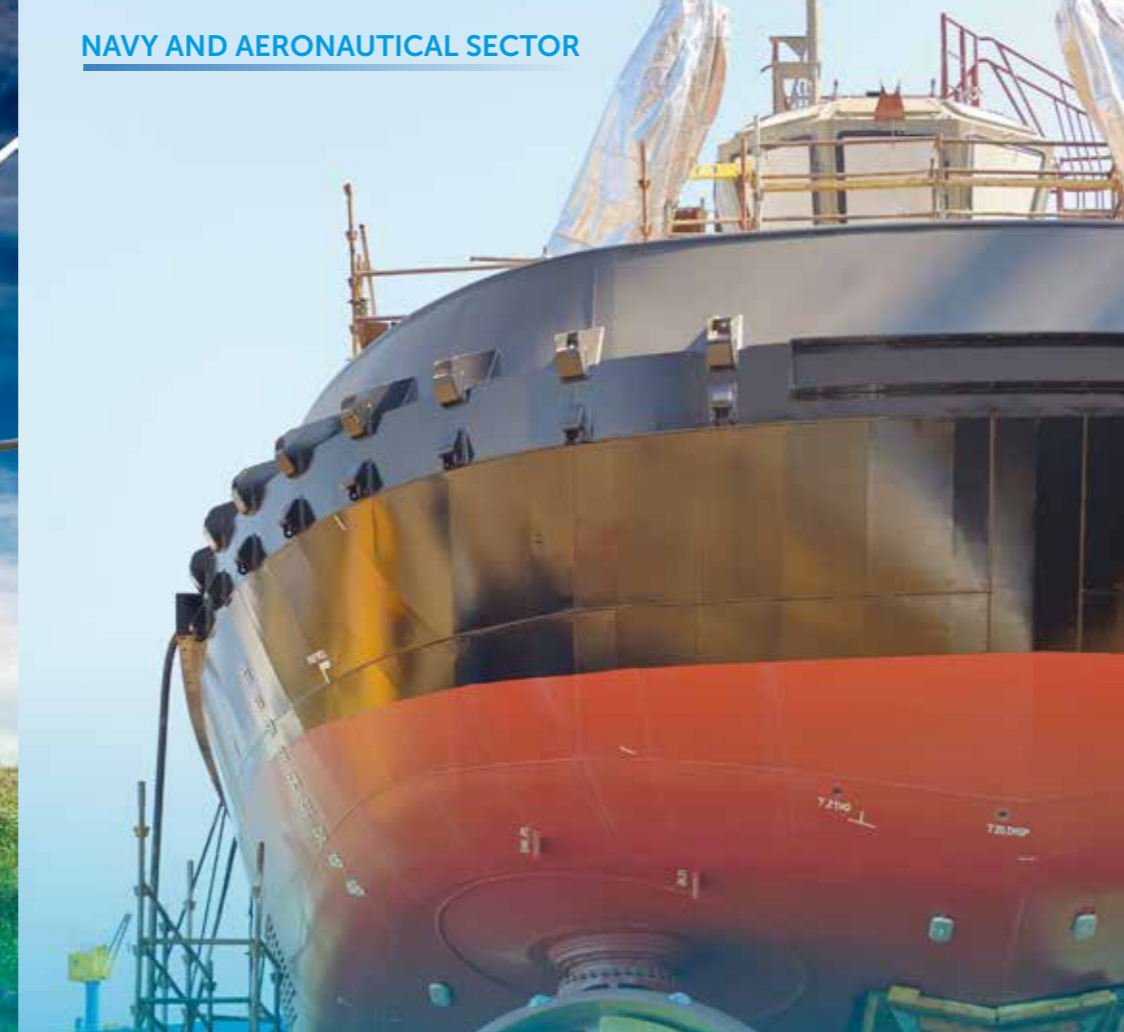

GREEN ENERGY SECTOR

ITESAL has an annual extrusion capacity of 17.000 tonnes, with different alloys as 1050, 6060, 6063, 6463, 6005 and 6082.

Reaching 4.728.000 square meter of powder coating.

The continuous improvement applies to the materials flow, ergonomic and safety policies consolidate our aim to improve the customer satisfaction, the quality and productivity of our products and our own staff satisfaction.

Our production plants are certificated by ISO 9001, ISO 14001, QUALICOAT SEASIDE and dimensional control for profiles through ASCONA scanner system.

NAVY AND AERONAUTICAL SECTOR

Quality system

Quality is the main aim of ITESAL.

Our quality system is certificated since 2003 by AENOR with 9001/2015 standards:

- Analyses what there is to make (to avoid)
- Making what was decided (to be controlled)
- Documenting the results (to be registered)

The quality department issues certificates to ensure the characteristics of the product that customer demand. Our finishing plant is certificated by QUALICOAT SEASIDE.

SPORT SECTOR

Flexibility

The quality of our processes, our services and products, the continuous research and developing achieve by our Engineering department and our strict quality control are the main 4 bases of our business, and allow us to be on the top of our sector.

AUTOMOTIVE AND ELECTRONIC SECTOR

Reliability

Our Engineering department satisfies the needs of our clients, helping them to develop their projects and innovating in every process.

All of this makes the best option to guarantee the stability, competitiveness and service that you company needs.
